

Andrew Jiang

(347) 400-1471 | New Hyde Park, NY | andrew.jiang48@gmail.cuny.edu | linkedin.com/in/ajiangnyc | github.com/ajiangny

EDUCATION

CUNY Queens College

Bachelor of Science (BS), Computer Science

Graduating May 2027

Flushing, NY

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming in C++ and Java, Computer Architecture, Theory of Computation, Software Engineering, Web and Internet Technologies, Calculus I/II, Discrete Math, Discrete Structures

WORK EXPERIENCE

PEAR PROTOCOL

Software Developer (Contract)

Jan 2023 - Jan 2025

Remote, United Kingdom

- Engineered and produced layered Photoshop assets structured for programmatic compositing across a 10,000+ image generative collection.
- Wrote Python scripts to composite layered art assets into PNG outputs, forming the core generation pipeline for the collection launch.
- Configured a rarity-weighting system enabling non-technical team members to adjust generation parameters without code changes.
- Automated metadata formatting for deployment, achieving 100% accuracy across all entries for smart contract integration.

PROJECTS

HACKKNIGHT 2026 OFFICIAL PLATFORM

Frontend Lead – Next.js, Javascript, TypeScript, Tailwind CSS, Framer Motion, Express.js

April 2026

Code For All, Queens, NY

- Architected a Next.js event platform with modular components handling registration and scheduling for 200+ participants.
- Designed an admin dashboard and dynamic schedule engine with Express.js, enabling real-time event management without code changes.
- Established Git branching standards and CI/CD pipelines, reducing deployment friction across a 3-person development team.
- Standardized Tailwind CSS design tokens across 13+ reusable components, reducing UI inconsistencies and troubleshooting time.

ART FUNDAMENTALS TUTOR (GEMINI 3 HACKATHON)

Lead Developer – React, TypeScript, Three.js, Gemini API

Dec 2025 - Feb 2026

New York, NY

- Integrated Gemini Pro Vision API to evaluate drawings against wireframe overlays, achieving a 90% AI-to-rubric correlation rate.
- Built a Three.js canvas workspace implementing three-point perspective geometry with dynamic vanishing point guides.
- Cut image payload sizes by 60% via client-side compression, reducing Gemini API latency and transfer costs.
- Drove a 30% improvement in drawing accuracy, measured by AI-scored rubric compared against a built-in 3D reference cube.

BANK STATEMENT PARSER

Software Developer – Python, SQLite, Flet

Nov 2025

Freelance, Brooklyn, NY

- Created a Python desktop app using Flet to automate financial data extraction from PDF bank and vendor statements.
- Developed a Regex parsing engine processing 10,000+ transactions across multi-format layouts with 97% accuracy.
- Implemented a normalized SQLite schema powering automated monthly reports across 12+ months of transaction history.
- Reduced client reconciliation time by 85%, from 15 hours to 2 hours monthly, saving ~150 labor hours annually.

LEADERSHIP & ACTIVITIES

CODE FOR ALL

Web Developer | Event Manager

Jan 2026 - Present

Queens, New York

- Lead frontend development for HackKnight 2026, directing a 3-person team to design and ship the club's official event platform.
- Coordinate vendor and venue logistics, streamlining event planning workflows across a 2,000+ member Discord community.
- Redesigned the club's full brand identity including logo and graphic assets, establishing a cohesive visual language across all club materials.
- Collaborate with external clubs and partners to co-organize events, expanding the club's network and event reach.

CODE RESOLVE

Project Manager

Aug 2025 - Present

Queens, New York

- Planned and executed 3 technical workshops on JavaScript, Git workflows, and frontend architecture for 30+ students per session.
- Onboarded new members by introducing club structure, ongoing projects, and development workflows.
- Guided event logistics end-to-end, managing scheduling, venue setup, and attendee communication.
- Promoted workshops and events to a 700+ member Discord community, driving attendance and visibility for each session.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C++, Java

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS, Framer Motion, Three.js, Flet

Databases & Hosting/Deploying: MySQL, SQLite, Firebase Firestore, Vercel

Tools & Technologies: VS Code, PyCharm, Eclipse, IntelliJ, Figma, Notion, GitHub, Microsoft Office
