Andrew Jiang

(347) 400-1471 | New Hyde Park, NY | andrewjiang74@gmail.com | linkedin.com/in/ajiangnyc | github.com/ajiangny | ajiangart.com

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C#, C++, SQL, HTML/CSS
Frontend: React, Next.js, Tailwind CSS, Three.js, Framer Motion, Vite
Backend: Node.js, Express.js, PostgreSQL, Prisma, Supabase, SQLite, REST APIs, Zod
Tools: Git, GitHub, Docker, CI/CD, Azure, Vercel, Railway, Figma

EDUCATION

CUNY Queens College **Expected Dec 2027**
Bachelor of Science (BS), Computer Science *Flushing, NY*

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Compilers, Computer Architecture, Theory of Computation, Software Engineering, Web & Internet Technologies, Object-Oriented Programming in C++ and Java

WORK EXPERIENCE

CUNY TECH PREP **Jul 2026 - Present**
Web Development Fellow *New York, NY*

- Building SplitBill end-to-end, an AI receipt-scanning bill splitter spanning the Prisma schema, REST API, and Next.js UI.
- Modeled an 8-table Postgres schema with composite constraints that make duplicate members and double-billed receipts impossible.
- Authored the API contract for 15 endpoints, giving a 5-person team one shared pattern for Zod validation, access scoping, and errors.
- Devised a largest-remainder rounding algorithm so every member's itemized subtotal, tax, and tip add up to the receipt total.

PEAR PROTOCOL **Jan 2024 - Jan 2025**
Software Developer *Remote*

- Engineered a Python automation pipeline processing a 10K+ image generative collection with PIL-based compositing.
- Automated metadata generation and schema validation across the full collection, catching malformed records before deployment.
- Configured a rarity-weighting system with JSON parameters, enabling non-technical users to adjust generation logic.
- Supported iterative client revisions by regenerating full collections with adjusted trait pools and output parameters.

PROJECTS

HACKKNIGHT 2026 OFFICIAL PLATFORM **Dec 2025 - Present**
Lead Developer – React, TypeScript, Tailwind CSS, Express.js, PostgreSQL, Supabase

- Architected a hackathon event platform built to support 200+ participants, owning registration, scheduling, and admin workflows end to end.
- Built a React admin dashboard on an Express API with staged batch edits, letting organizers reschedule sessions live without a redeploy.
- Containerized local Supabase environments with Docker, giving the team reproducible database migrations and isolated testing.
- Implemented a lane-packing algorithm for a Gantt-style room reservation view, preventing double-booked sessions across concurrent tracks.

RONIN'S REVENGE **Nov 2026**
Solo Developer – Unity, C#, Claude Code, Unity MCP, Node.js, ElevenLabs API

- Built a reactive dialogue engine in C# that picks from 600+ conversations by priority tier, cross-run save state, and per-line cooldowns.
- Orchestrated parallel AI agents with Paseo across 640+ commits in 2 weeks, isolating tasks in git worktrees and guiding them with system docs.
- Connected agents to the live Unity Editor via Unity MCP, with idempotent editor commands that rebuild prefabs, scene wiring, and audio.
- Wrote Node.js pipelines on the ElevenLabs API generating 1,190+ voice clips, 130+ sound effects, and 15 music tracks, post-processed in ffmpeg.

COLOR PALETTE EXPLORER **Oct 2026**
Software Developer – Python, React, TypeScript, Supabase, Gemini

- Built a palette search app that matches any image to 7,600 public-domain paintings and explains the artists' color use with cited sources.
- Designed two-stage retrieval: pgvector search over CIELAB histograms, reranked by Earth Mover's Distance on k-means palettes.
- Grounded Gemini in museum descriptions and Wikipedia via RAG, validating citations and filtering misattributed sources.
- Created tests where the app found the original painting in its top 5 results for 90% of cropped and recolored copies, plus blind human ratings.

LEADERSHIP & ACTIVITIES

CODE FOR ALL **Jan 2026 - Present**
Secretary | Lead Web Developer *Queens, New York*

- Manage board correspondence and archive meeting documentation for a Discord community exceeding 2,000 members.
- Facilitate campus venue logistics and university facility coordination to deliver support for 3+ workshops per semester.
- Collaborate with club leadership to shape presentations and semester-long strategic initiatives for the organization's roadmap.
- Spearhead a full brand identity redesign, developing a cohesive identity to strengthen club recognition across campus.
