(347) 400-1471 | New Hyde Park, NY | andrewjiang74@gmail.com | linkedin.com/in/ajiangnyc | github.com/ajiangny | ajiangart.com

EDUCATION

CUNY Queens College

Bachelor of Science (BS), Computer Science

Graduating May 2027

Flushing, NY

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming in C++ and Java, Computer Architecture, Theory of Computation, Software Engineering, Web and Internet Technologies, Calculus I/II, Linear Algebra

WORK EXPERIENCE

PEAR PROTOCOL

Software Developer

Jan 2024 - Jan 2025

Remote, United Kingdom

- Engineered a Python automation pipeline processing a 10,000+ image generative collection with PIL-based compositing.
- Built Python scripts compositing layered assets into PNG outputs, forming the core generation pipeline for launch.
- Configured a rarity-weighting system with JSON parameters, enabling non-technical users to adjust generation logic.
- Automated structured metadata generation and validation for deployment, achieving 100% compliance across the full asset collection.

PROJECTS

HACKKNIGHT 2026 OFFICIAL PLATFORM

Lead Developer – React, JavaScript, TypeScript, Tailwind CSS, Express.js, PostgreSQL

April 2026

Code For All, Queens, NY

- Architected an event platform with modular components handling registration and scheduling for 200+ participants.
- Designed an admin dashboard and dynamic schedule engine with Express.js, enabling real-time event management without code changes.
- Containerized local Supabase environments using Docker, enabling safe database migrations and robust testing for the development team.
- Standardized Tailwind CSS design tokens across 13+ reusable components, reducing UI inconsistencies and troubleshooting time.

ART FUNDAMENTALS TUTOR (GEMINI 3 HACKATHON)

Lead Developer – React, TypeScript, Three.js, Gemini API

Dec 2025 - Feb 2026

New York, NY

- Integrated Gemini Pro Vision API via REST to evaluate drawings against wireframe overlays, hitting 90% rubric correlation.
- Built a Three.js canvas workspace implementing three-point perspective geometry with dynamic vanishing point guides.
- Cut image payload sizes by 60% via client-side compression, reducing Gemini API latency and transfer costs.
- Drove a 30% improvement in drawing accuracy, measured by AI-scored rubric against a built-in 3D reference cube.

BANK STATEMENT PARSER

Software Developer – Python, SQLite

Nov 2025

Freelance, Brooklyn, NY

- Created a cross-platform Python desktop app to automate data extraction from PDF bank and vendor statements.
- Developed a Regex parsing engine processing 10,000+ transactions across multi-format layouts with 97% accuracy.
- Optimized a normalized SQL schema for read-heavy workloads, powering automated monthly reports across 12+ months of data.
- Reduced client reconciliation time by 85%, from 15 hours to 2 hours monthly, saving ~150 labor hours annually.

LEADERSHIP & ACTIVITIES

CODE FOR ALL

Secretary

Jan 2026 - Present

Queens, New York

- Manage board correspondence and archive meeting documentation for a Discord community exceeding 2,000 members.
- Facilitate campus venue logistics and university facility coordination to deliver support for 3+ workshops per semester.
- Collaborate with club leadership to shape presentations and semester-long strategic initiatives for the organization's roadmap.
- Spearhead a full brand identity redesign, developing a cohesive identity to strengthen club recognition across campus.

CODE RESOLVE

Project Manager

Aug 2025 - June 2026

Queens, New York

- Planned and executed 3 technical workshops on JavaScript, Git workflows, and frontend architecture for 30+ students.
- Onboarded new members by introducing club structure, ongoing projects, and development workflows.
- Guided event logistics end-to-end, managing scheduling, venue setup, and attendee communication.
- Promoted workshops and events to a 700+ member Discord community, driving attendance and visibility for each session.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, SQL, HTML/CSS

Frontend: React.js, Tailwind CSS, Framer Motion, Three.js

Backend: Node.js, Express.js, PostgreSQL, SQLite, Supabase

Developer Tools: Git, GitHub, CI/CD, Docker, Vercel, VS Code, Figma, Claude Code
